

Digital Technology in Mr. Zahner's Class

Procedures

The applications we use in our history class have been selected to meet specific needs for learning and assessment. If you are unfamiliar with digital technology or unsure about your skills, this is your opportunity to practice them in a safe environment.

Every student in Denton ISD has a Google Apps for Education account. This makes it safer and less time consuming, ensuring that learning is our focus, always and for all.

Google Classroom

Classroom weaves together Google Docs, Drive and Gmail and lets you organize your work, complete and turn it in, and communicate directly with teachers and peers.

Google Drive*

Once your g.dentonisd.org account is setup, you will have access to all Denton apps, including Drive.

GMAIL

You'll find that since it is linked to Drive and Classroom and has the same tools, use will soon be routine.

Remind

Formerly called Remind101, this is an anonymous group texting service designed for education. Messages will often include links to important information about 5 to 7 times a week.

Today's Meet

This microblogging (140 characters) site is used for discussions as backchannel or on the overhead projector, depending on the technology available to us.

Verso App*

Most homework assignments will be completed using this application.

Quizlet*

All vocabulary is available here. Ask to join the class for easier access.

*Mobile app available.
